Sceanrio 1:

Weak scenario:

ICEPOT scenario:

Write test cases to search items in https://www.flipkart.com/

Instruction :

[STRICT] - Write only functional test cases

[MANDATORY] - All positive and negative cases must be included

[PRIORITY] - Highlight the critical test cases and fill the priority column as high, medium, low

Context :

The search functionality on Flipkart allows users to search for products by entering keywords, product names, or brands in the search bar. The system should display relevant products, provide search suggestions, and handle invalid or unmatched search queries appropriately.

Example :

Test case ID, Test Case Name/description, status, priority, expected results columns required

Persona :

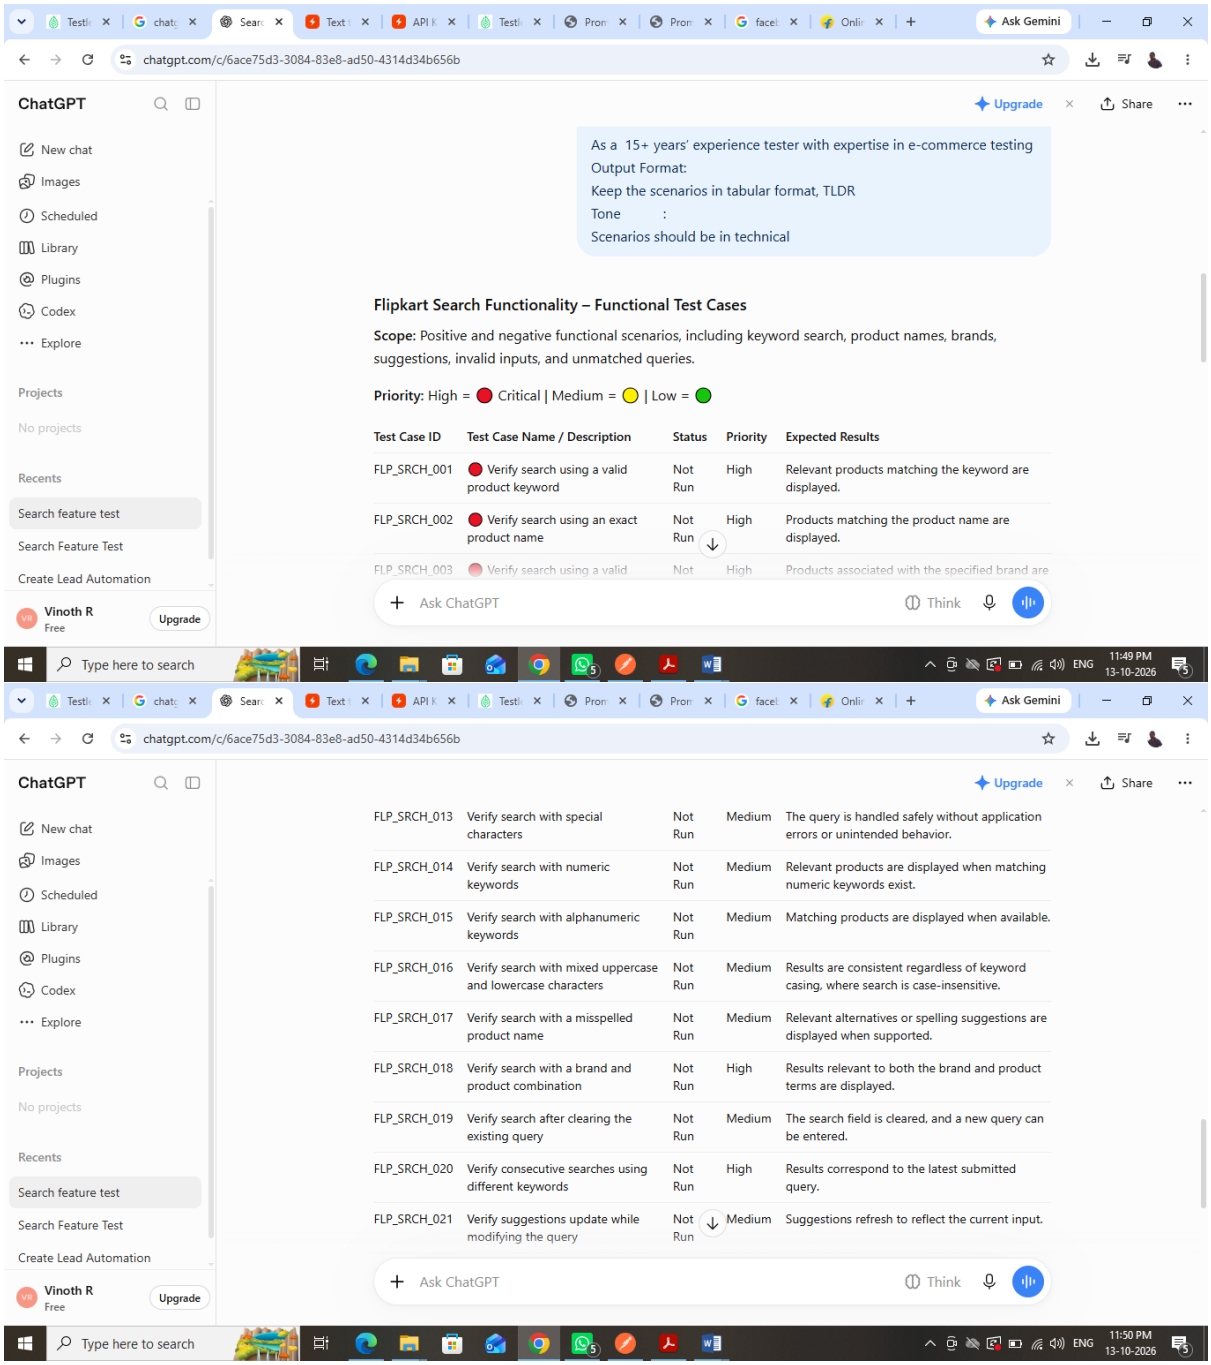

As a 15+ years' experience tester with expertise in e-commerce testing

Output Format:

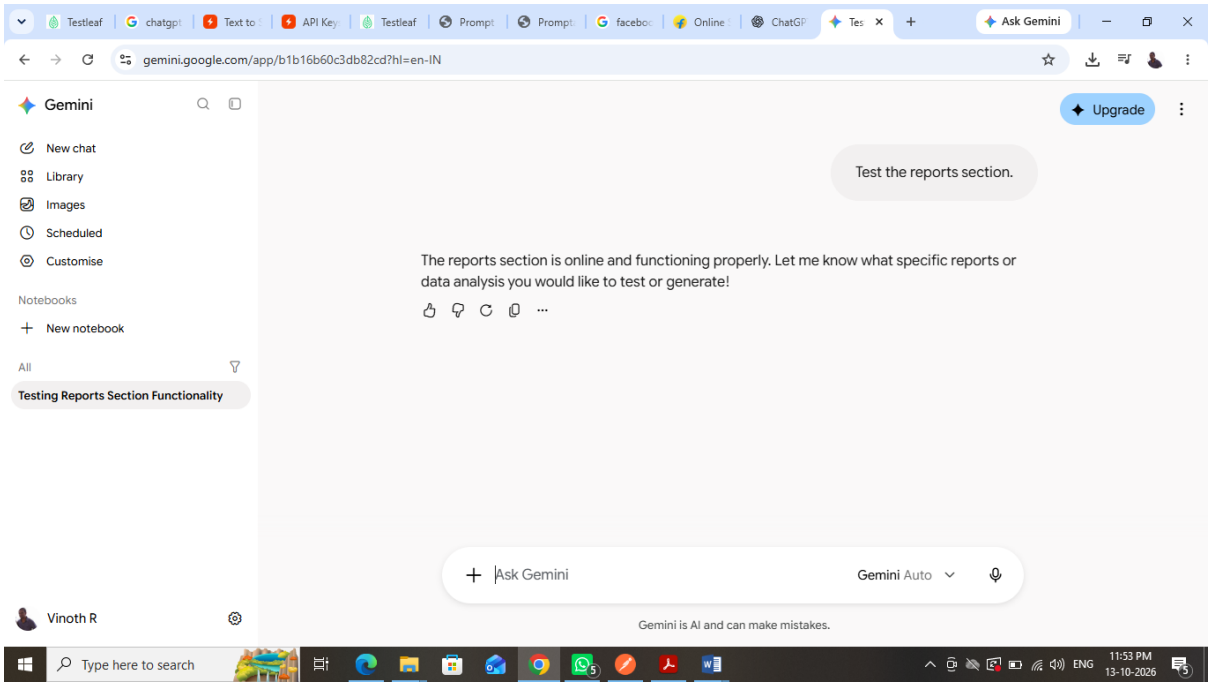

Keep the scenarios in tabular format, TLDR

Tone :

Scenarios should be in technical

Scenario 2: **Dashboard / Report Generation**

ICEPOT scenario:

Write test cases to test the report section in octane

Instruction :

[STRICT] - Write only functional test cases

[MANDATORY] - All positive and negative cases must be included

[PRIORITY] - Highlight the critical test cases and fill the priority column as high, medium, low

Context :

The report should show all the Pass, fail, no run and skipped test case details with executed by

Example :

Test case ID, Test Case Name/description, status and executed by columns required

Persona :

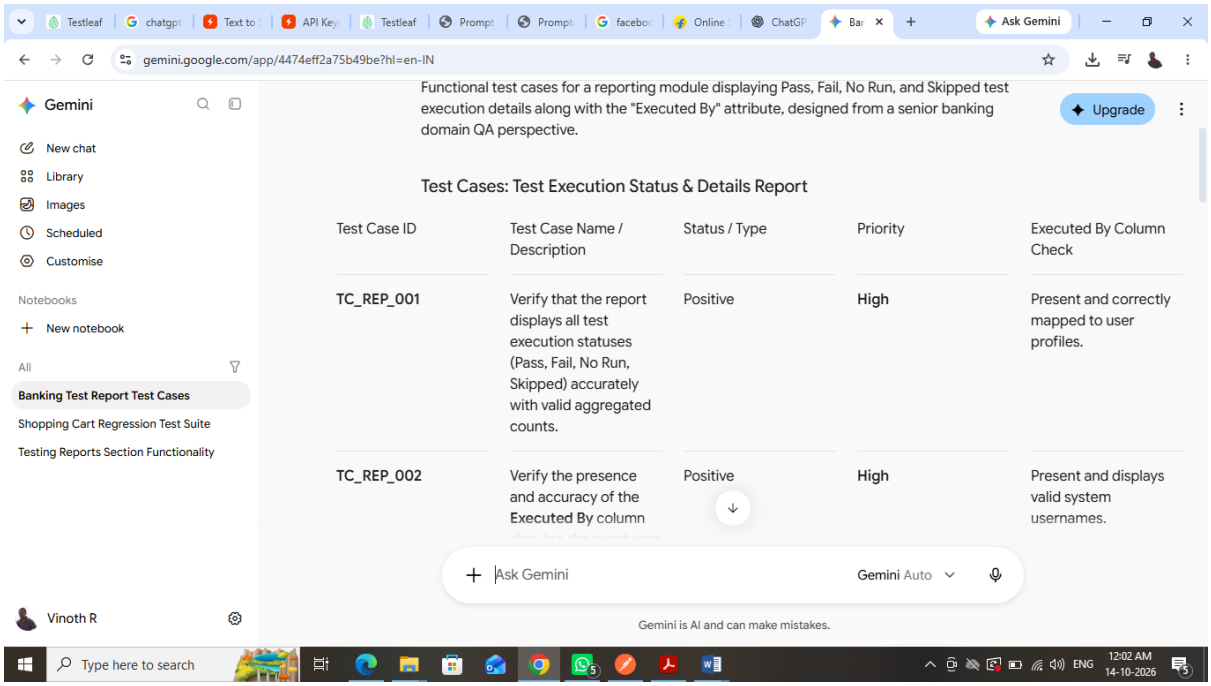

As a 15+ years' experience tester with expertise in banking domain

Output Format:

Keep the scenarios in tabular format, TLDR

Tone :

Scenarios should be in technical

Scenario 3:

Shopping Cart

ICEPOT scenario:

Write test cases to test the shopping cart in flipkart.com

Instruction :

[STRICT] - Write only regression test cases

[MANDATORY] - All positive and negative cases must be included

[PRIORITY] - Highlight the critical test cases and fill the priority column as high, medium, low

Context :

The shopping cart should allow the users to add upto 10 items , and able to view/delete the cart items from shopping cart page

Example :

Test case ID, Test Case Name/description, status , expected results columns required

Persona :

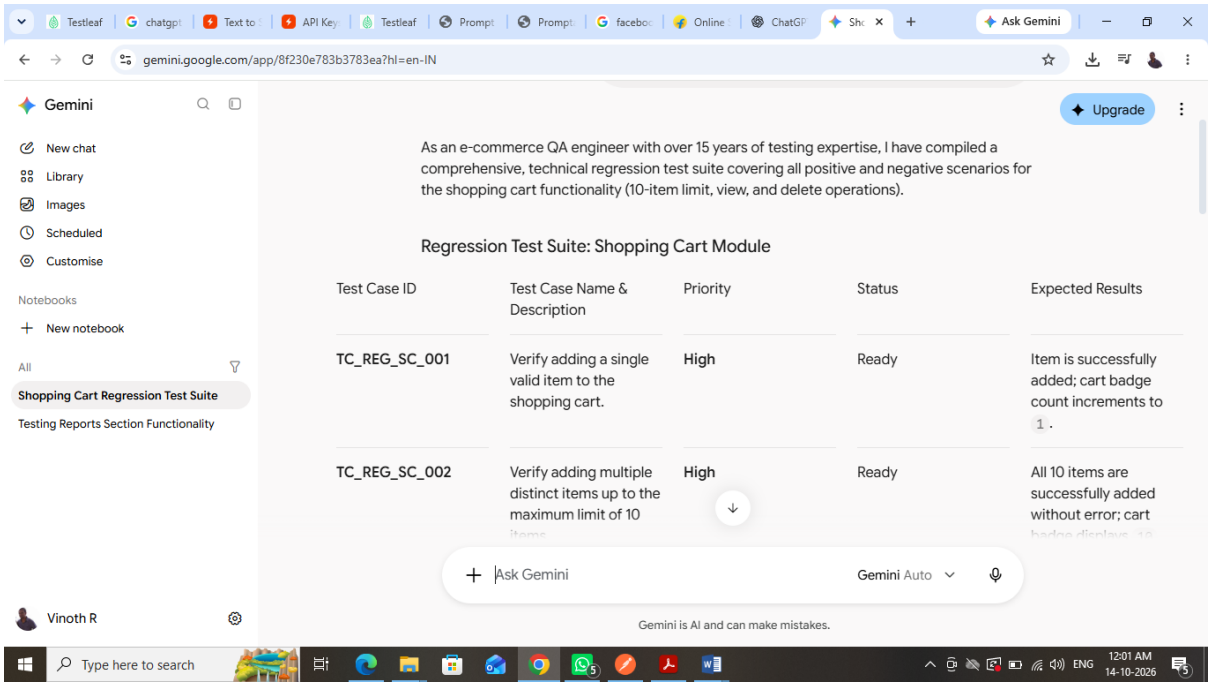

As a 15+ years' experience tester with expertise in e-commerce testing

Output Format:

Keep the scenarios in tabular format

Tone :

Scenarios should be in technical format

Shopping Cart Regression Test Suite
Testing Reports Section Functionality
Vinoth R
Upgrade
As an e-commerce QA engineer with over 15 years of testing expertise, I have compiled a comprehensive, technical regression test suite covering all positive and negative scenarios for the shopping cart functionality (10-item limit, view, and delete operations).
Regression Test Suite: Shopping Cart Module
Test Case ID
Test Case Name & Description
Priority
Status
Expected Results
TC_REG_SC_001
Verify adding a single valid item to the shopping cart.
High
Ready
Item is successfully added; cart badge count increments to 1.
TC_REG_SC_002
Verify adding multiple distinct items up to the maximum limit of 10
High
Ready
All 10 items are successfully added without error; cart
